THE BENEFITS OF KANGEN WATER™

- **Absorption** Softens various ingredients
- **Dissolving property**.... Dissolves and extracts ingredients effectively
- **Conduction of heat** Speeds up boiling time by improving conduction of heat

1. Use as drinking water

Drink two to three cups of water first thing in the morning

Compared to tap water, Kangen Water™ has no unpleasant odor, tastes lighter, and has a pleasantly sweet flavor.

2. To prevent hangovers, drink before going to bed

Drink two to three cups to reduce the symptoms of hangovers.

3. For drinking during meals

It is important to include vegetables in your diet especially when eating substantial amounts of acidic foods such as egg yolk, white rice, chicken, pork and beef. Drinking alkaline Kangen Water™ is equally important because it balances the acidic and alkaline effects of these foods.

4. Use when brewing green tea, coffee, and English tea, to obtain a wonderfully mild flavor and improved color.

Green Tea : Prevents tannin in the tea and brews the tea with a rich color.

Eliminates the bitter aftertaste common in teas. The teas are delicious even when served cold.

Coffee : Improves aroma and color, while preserving the naturally acidic taste of coffee. You can obtain a full, rich taste, even when using only half the usual amount of coffee beans.

English Tea : For mild taste and rich color

5. Add Kangen Water™ to whisky for a smoother, milder flavor. Make ice cubes with Kangen Water™ as well.

Whiskey is a strong acidic liquor but diluting it with alkaline Kangen Water™, (with its alkaline properties), will help prevent hangovers. (Test using pH reagent)

6. Use heated Kangen Water™ when diluting beer, sake, and other spirits.

Depending on the amount of the beer, add about 5-20 % Kangen Water™. The beer will seem milder but not lose its taste.

7. When preparing soups, Kangen Water™ draws out the flavor of the soup stock, even when very little seasoning is used.

Prepare a delicious soup with Kangen Water™. Its dissolving property draws out the natural flavor of the ingredients.
